

- **Top Political Blog Posts of 2020**

- **1. The JOP's Political Science Blog: The Consequences of Partisan Behavior in Congress**

This academic deep dive analyzed how extreme partisanship and reduced cross-party cooperation lead to legislative gridlock and erode public trust. It offered a non-partisan, data-driven look at systemic dysfunction, standing out from the noise of daily headlines.

- **2. The Political Price Authoritarians Pay**

Focusing on emerging democracies, this post explored how former authoritarian figures face long-term reputational costs. It used global case studies to underscore the enduring consequences of corruption and abuse of power.

- **3. George Floyd's Murder Decreased Support for Local Police Budgets**

This post used polling data to link Floyd's death with a marked shift in public opinion on police funding. It gave weight to the 'defund the police' debate with quantifiable evidence, making it a pivotal commentary of the year.

- **4. Presidents Worldwide Reform Constitutions to Extend Terms**

By highlighting global cases of democratic backsliding, this article raised alarms about constitutional reforms used to legitimize authoritarian power grabs. It connected the dots across continents, elevating local concerns into a global narrative.

- **5. Strategic Ambiguity: How Candidates Cultivate Identities**

This blog unpacked how politicians use vague messaging to appeal broadly without alienating voters. Drawing on classic political science, it exposed the mechanics behind electoral communication during the 2020 cycle.

- **6. Data Privacy and GDPR: Your Rights in a Digital Age**

With increased online activity during the pandemic, this post educated readers on GDPR rights like the 'right to erasure' and offered actionable guidance. It tapped into growing public concern over digital surveillance and data control.

- **7. The Political Representation of Public Sector Employees**

This post examined whether public sector employees have distinct political leanings, especially in the context of their pandemic-era prominence. It analyzed voting data and political donations to explore this under-discussed but important demographic.
